

Data Collection and Preprocessing Phase

Date	15 july 2024
Team ID	739947
Project Title	Slop sense: utilising resort features for regression modelling
Maximum Marks	6 Marks

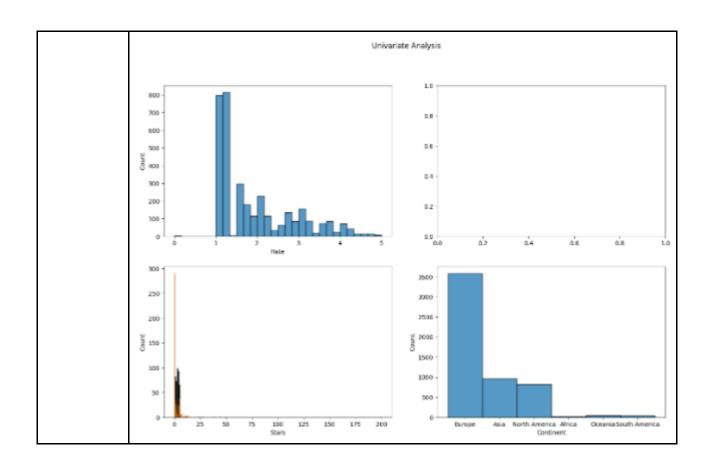

Data Exploration and Preprocessing Report

Data exploration and preprocessing are crucial steps in the data science process, enabling you to understand and prepare your data for analysis and modeling. Here's a more detailed breakdown of these Initial Data Review, Descriptive Statistics, Data Visualization, Correlation Analysis, OutlierDetection&Handling Missing Values, Data Normalization, Data Transformation, Feature Selection, Feature Engineering, Data CleaningData Formattin:
